Birth of RentEasy

Many Indians facing the problems on finding a house or shop for Rent. I had Noticed this problem from my relatives. Then I decided to build RentEasy to solve this problem.

Started building on october 2019

Published in Play store on 1st April 2020

Reason 1

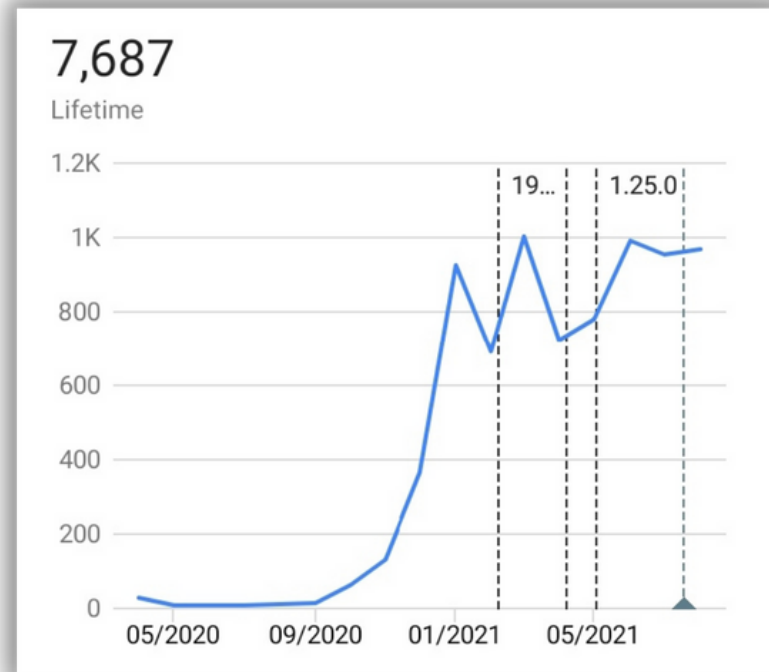

Before any other apps RentEasy should reach #1 app for house and shop Renting in India.

Reason 2

Everyone is depending on Smartphone in day to day life,

TIMING

App Statistics

Total Installs

7687 Installs as of 1 September 2021.

Uninstall Rate

5152 Uninstalls as of 1 September 2021.

67% of users lost.

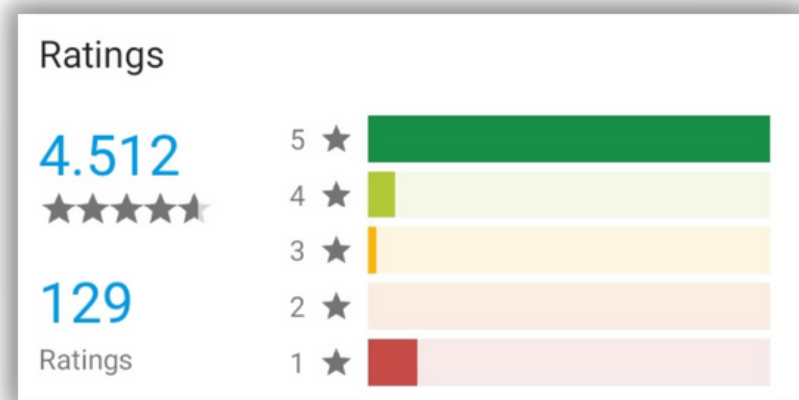

Monthly Active Users

772 Active Users on January 2021.

The Uninstall rate is high because the content or Properties in the servers is very less.

And the users only need this app when they are shifting their house so uninstall rate is high and active users are less. To overcome this we are trying to update and addict user to pay rent using app but need to reward user to pay rent using RentEasy.

App is good but it asks to enter pin code when I want to search property for multiple locations. It has less data which is not going to help us. Kindly expand the data so that people can use.

Competitive Advantages :

Advantage 1

RentEasy not only for Major cities it's also for cities, small cities, Towns and Villages.

Advantage 2

Other Competitors are only paid services. But RentEasy is based on Ads.

Competitor Approach

Approach 1

As soon as possible we need to add houses & shops which are at areas where the compititors are not there.

Approach 2

We can Reach our users by ASO and Referal System.

Approach 3

Events, partnerships, ads on Tv and social Media etc.. are the other efective ways to reach users.

Business or Revenue Model

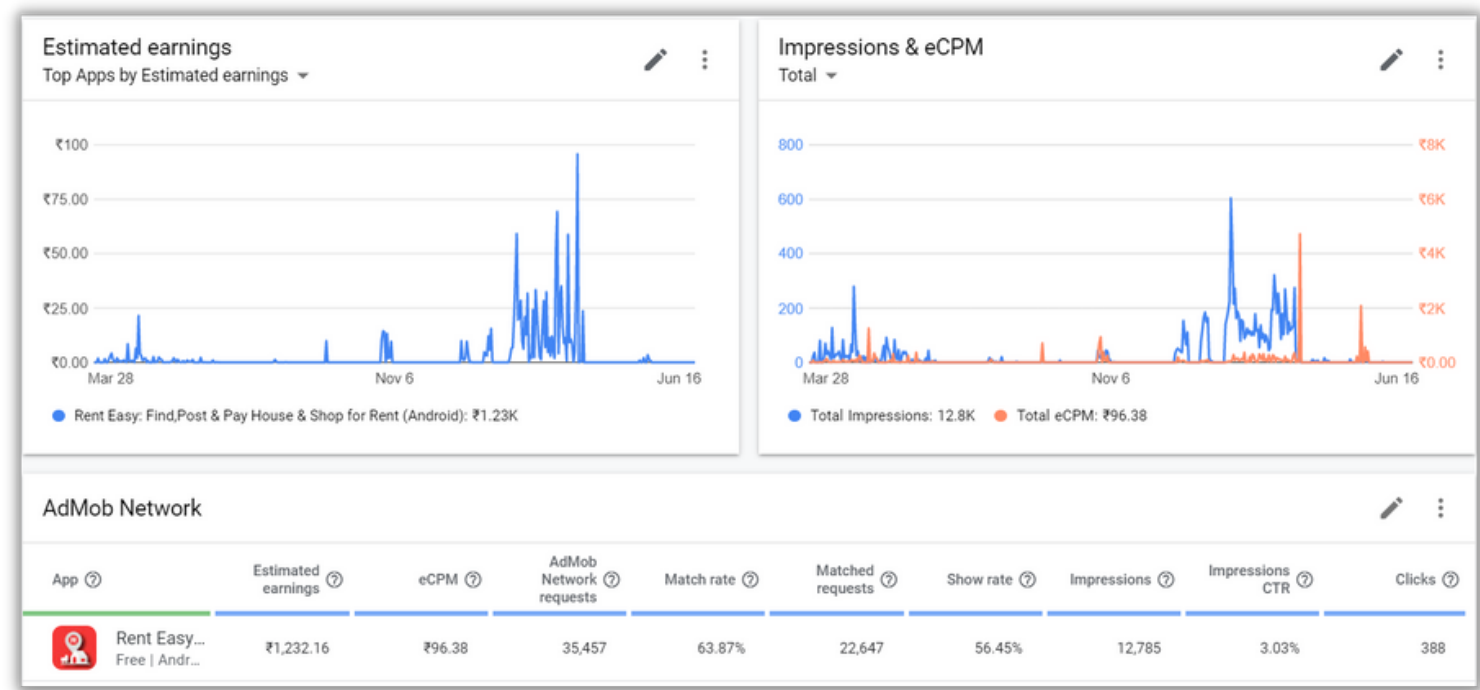

Totally there are 5 Revenue generating ways from RentEasy. But currently first two are Implemented.

All Revenue Generating Ways :

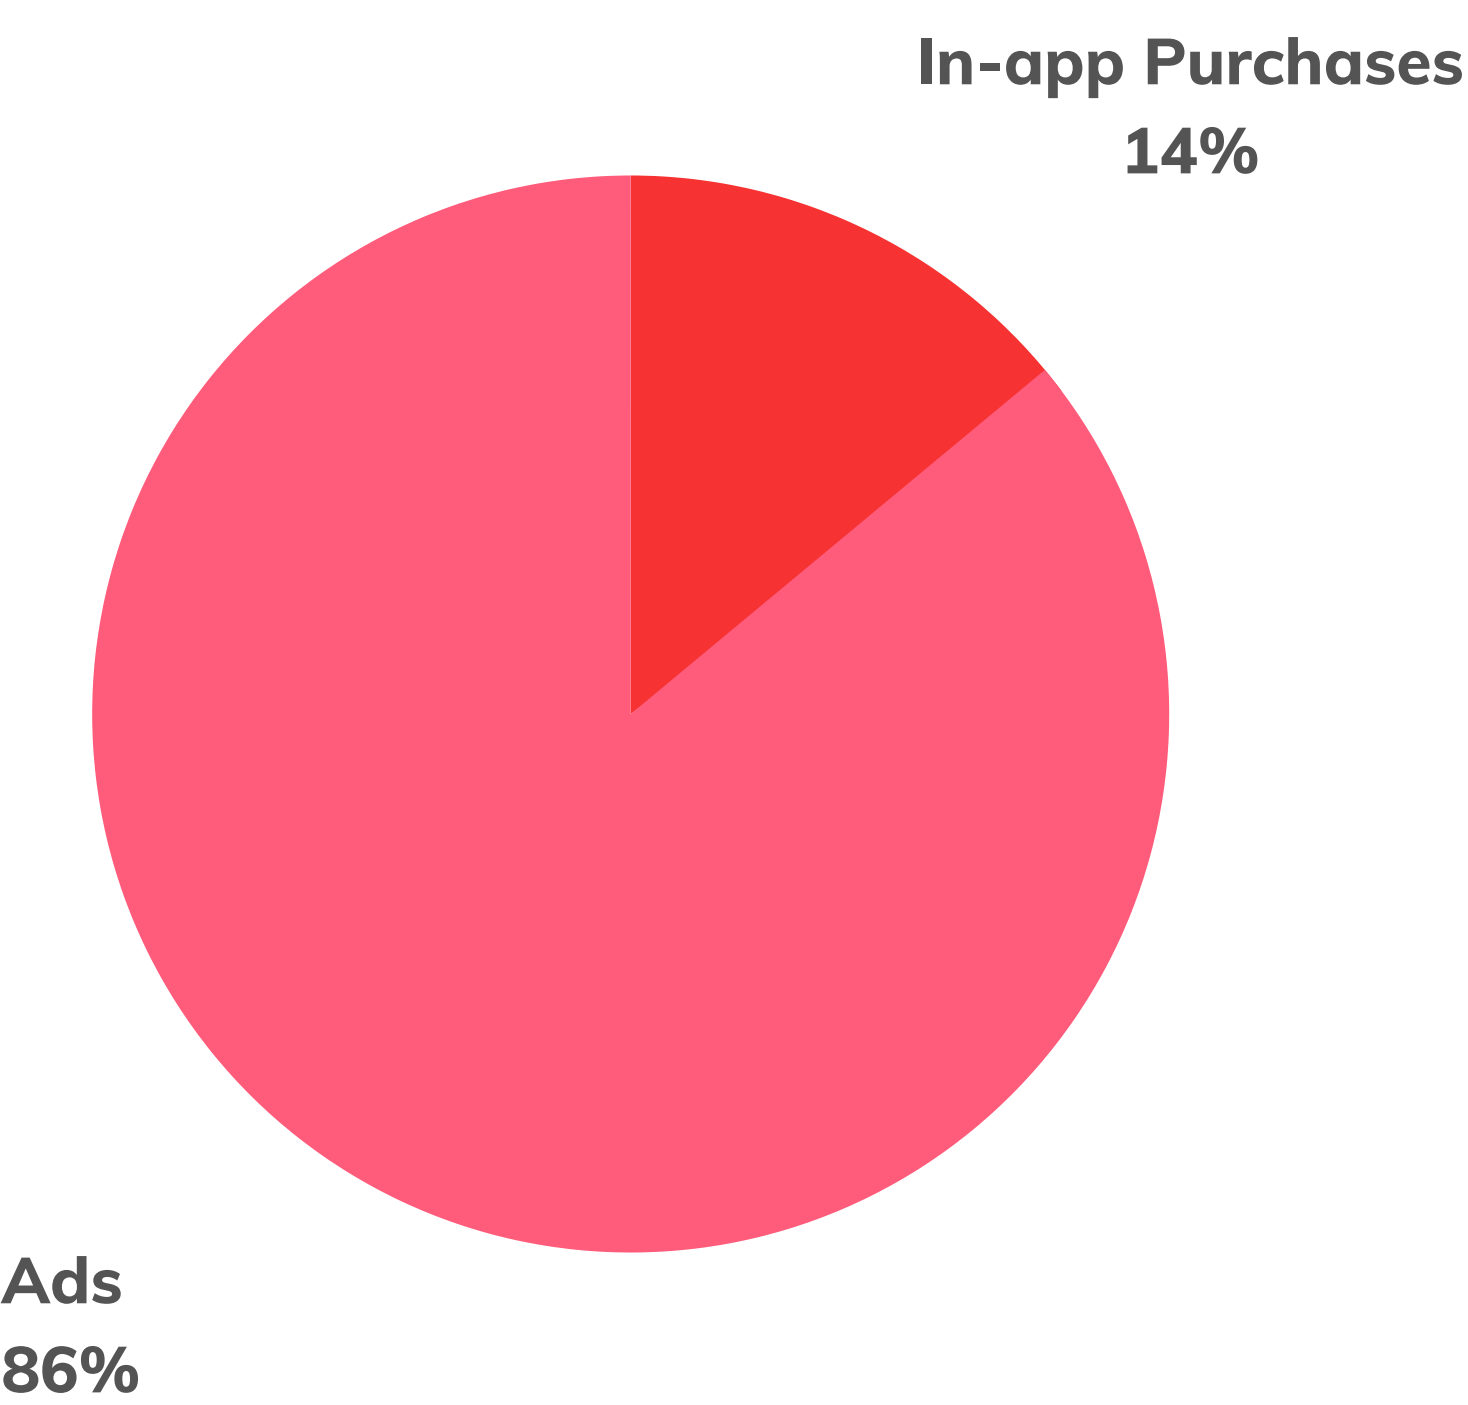

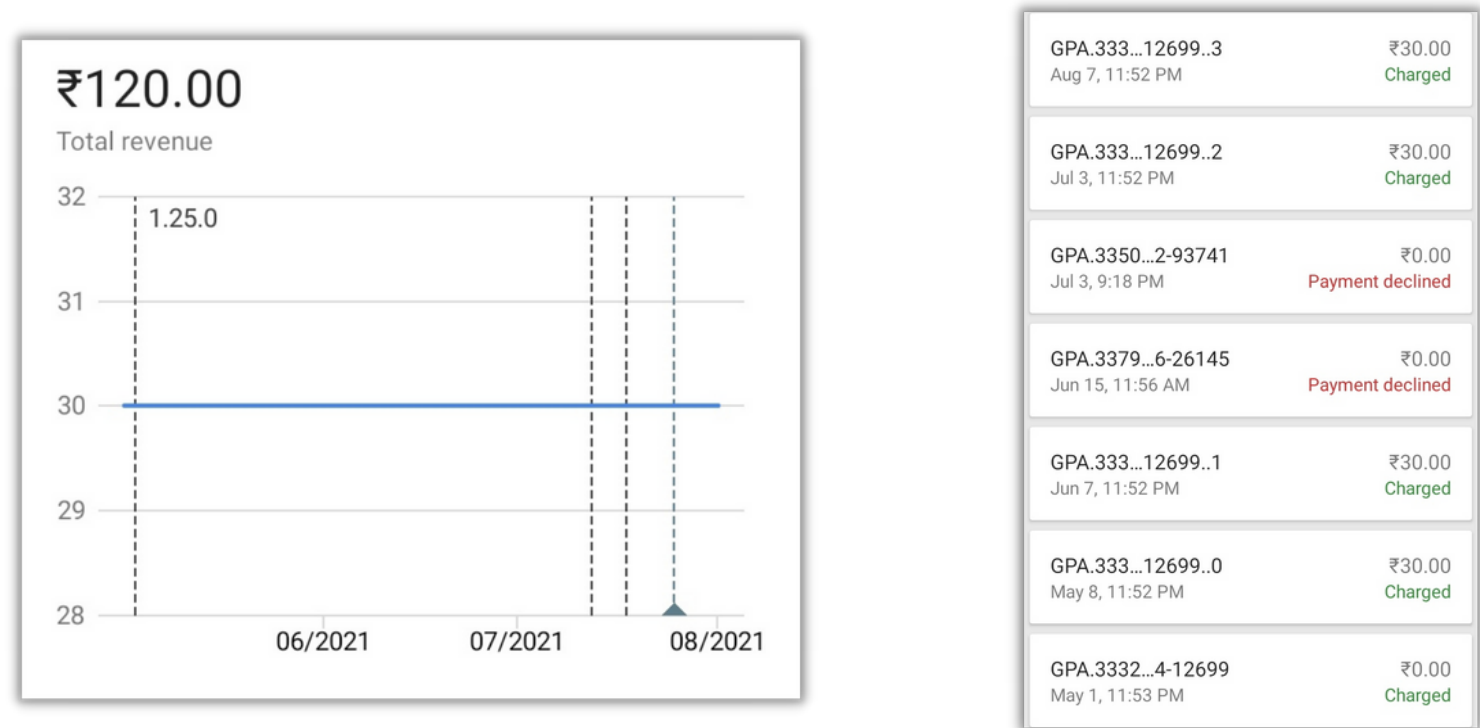

1. Google Admob ads placed in the app.
2. In-App Purchases to block ads & paid features.
3. Promote Property for house owners.
4. Rewards Affiliate Marketing (rewards given for users when they pay rent).
5. House Shifting Services like rental agreemnet, packers & movers.

Revenue from In-app Purchases

Future Updates & Expantions :

New Features & Plans

New features like Share property, liked properties, properties for lease, property rating & review, property pre-booking, home cleaning & repairing services. And paid features like Renter Alert for Owner, Verify property, 360 degree view, filters, block ads etc..

Pay Rent Offers & Rewards

This is already available but there are less no. of rewards. We can start doing affiliate marketing with the reward coupons. Percentage offer on monthly rent payment using credit or debit card for festivals with terms and conditions.

One click House Shifting

Contacting Owner, rental agreement, home cleaning & painting services with packers and movers. With One click our team will do all these services while house shifting and users (renter & owners) can track this process in the app. By providing these services we will charge the user.

RentEasy Expansion

RentEasy for IOS and other app stores with local languages because more features & platforms then more users & Revenue. But first need to implement New features and gain users, revenue so then we can go for ios and other platforms.

Investment Usage :

Investment Needed :
~INR 10 Lac.

Equity Offering :
~10%-15%.

These are Estimated Funds & Usage for the first round. Goal is to implement new features, gain properties(content) & users to generate Revenue.

Conclusion :

RentEasy is great solution for House and shop renting in India. Other than Big cities like Mumbai, Hyderabad, Pune, Delhi etc.. There are many cities & small cities & towns in India. Nearly more 15Million+ houses and 5M+ shops for rent in India as of 2011. The only thing that is lagging behind is Marketing, Advertising and awareness in people. We can over come this with good marketing strategies. One click House shifting is also a good & unique feature.
